

Why I love the Country

I live ~~in~~ the country and its always fun beacuse when I wake up in the morning I can see the sun rise over the hills. I have a great view from my house too. We can see the coast line and the fields are so beautiful. I like the country beacuse I can have animals that people in the city cant like horses, pigs, goats, cows, and chickens! Its also cool in the country beacuse I can make forts in the woods with my sisters! And sometimes when our mom is busy we walk down to the bus stop by ourselves and it is sometimes cold and rainy but its fun to play in the rain in the country if you have a coat on! Then when its snowy we go out and play all day! when we come back in its warm and the wood stove is heating the house but the best part is the coco! →

I am happy to live in
the country. And thank you for
letting me tell you about it.
